ROCHER DEBOULE MINERALS CORP.
(formerly Ameridex Minerals Corp.)
Notes to the Interim Consolidated Financial Statements
For the Three and Six Month Periods Ended January 31, 2008

1. NATURE AND CONTINUANCE OF OPERATIONS

The Company was incorporated on July 8, 1987 and on September 1, 2006 changed its name from Ameridex Minerals Corp to Rocher Deboule Minerals Corp. and commenced trading on the TSX Venture Exchange, NEX Board. The Company's application for listing on Tier 2 (from NEX) was accepted by the TSX Venture Exchange. The trading symbol for the company will be RD.

The Company is in the exploration stage of developing mineral property interests.

The Company has incurred losses since its inception and as at January 31, 2008 has an accumulated deficit of \$6,419,263. The Company does not generate cash flow from operations to fund its exploration activities and has therefore relied principally upon the issuance of equity securities for financing. The Company intends to continue relying upon the issuance of these securities to finance its operations and exploration activities to the extent such instruments are issuable under terms acceptable to the Company. Accordingly, the Company's financial statements are presented on a going concern basis, which assumes that the Company will continue to realize its assets and discharge its liabilities in the normal course of operations. If future financing is unavailable, the Company may not be able to meet its ongoing obligations, in which case the realizable values of its assets may decline materially from current estimates.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation

These interim consolidated financial statements included the accounts of the company and its wholly owned subsidiary, incorporated in the State of Nevada U.S. All significant intercompany transactions have been eliminated.

Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements, as well as the reported amounts of revenues and expenses incurred during the periods. Actual results could differ from those estimated.

Mineral properties and deferred costs

The cost of mineral properties and their related direct exploration costs are deferred until the properties are placed into production, sold or abandoned. These deferred costs will be amortized on the unit-of-production basis over the estimated useful life of the properties following the commencement of production, or written-off if the properties are sold or abandoned.

Cost includes the cash consideration and the fair market value of any shares issued on the acquisition of property interests. Properties acquired under option agreements, whereby payments are made at the sole discretion of the Company, are recorded in the accounts when the payments are made. The recorded amounts of property acquisition costs and their related deferred exploration costs represent actual expenditures incurred and are not intended to reflect present or future values.

2. **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** *(continued)*

The Company reviews capitalized costs on its property interests on a periodic basis and will recognize impairment in value based upon current exploration results and upon management's assessment of the future probability of profitable revenues from the property or from the sale of the property. Management's assessment of the property's estimated current fair market value is also based upon a review of other property transactions that have occurred in the same geographic area as that of the property under review.

Administrative costs are expensed as incurred.

Cost of maintaining mineral properties

The Company does not accrue the estimated future costs of maintaining its mineral properties in good standing.

Fair value of financial instruments

The Company's financial instruments consist of current assets and current liabilities. The fair values of the current assets and liabilities approximate their carrying amounts due to the short-term nature of these instruments.

Share capital

Share capital issued for non-monetary consideration is recorded at the fair market value of the shares based on their trading price on the TSX Venture Exchange on the date the agreement to issue the shares are entered into as determined by the Board of Directors of the Company.

Costs incurred to issue shares are deducted from share capital.

Equipment

Equipment is amortized over its estimated useful economic life using the declining balance method at annual rates ranging from 20% to 100%. In the year of acquisition, one half the rate is applied.

Stock-Based Compensation

The Company follows the Recommendation of the Canadian Institute of Chartered Accountants to account for stock-based compensation. These recommendations require that all stock based awards made be recognized using a fair value-based method.

Future income taxes

The Company accounts for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Future tax assets and liabilities are measured using tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be settled. When the future realization of income tax assets does not meet the test of being more likely than not to occur, a valuation allowance in the amount of the potential future benefit is taken and no net asset is recognized. Such an allowance has been applied to all potential income tax assets of the Company.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Environmental expenditures

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. The overall future impact of such regulations is neither determinable nor predictable at the present time.

Environmental expenditures that relate to ongoing environmental and reclamation programs are charged against operations as incurred or capitalized and amortized depending on their expected future economic benefit. Estimated future removal and site restoration costs will be recognized when the ultimate liability is reasonably determinable, and will be charged against operations over the estimated remaining life of the related business operations, net of expected recoveries.

Foreign Currency Translation

The Company translates its foreign operations for monetary assets and liabilities at the rate of exchange in effect as at the balance sheet date and for non-monetary assets and liabilities at their historical exchange rates. Revenues and expenses are translated at the average rates prevailing for the year, except for amortization that is translated at the historical rate of the related assets.

Foreign exchange gains and losses from the translation of foreign operations are recognized in the current period.

Loss per share

Loss per share has been calculated using the weighted-average number of common shares outstanding during each fiscal year. Diluted loss per share has not been calculated as it is anti-dilutive.
